- REST API
- GIT
- Figma
- Energetic
- Perseverance
- Reliability
- Creativity

LANGUAGES

- English (A1 – Beginner)
- Czech — B1 (Intermediate)
- Ukrainian — Native speaker

SUMMARY

I am a Front-End Developer based in Liberec, Czech Republic, with a technical background in computer systems. I specialize in creating modern, responsive, and accessible web interfaces. My focus is on code quality, UI/UX improvement, and integrating external APIs. I enjoy working with HTML, CSS, JavaScript, and modern frameworks to build efficient single-page websites. I combine a pragmatic approach with creativity, ensuring interfaces are both functional and user-friendly. Outside of programming, I draw inspiration from my family and new ideas that help me grow professionally and personally.

PROJECTS

2024 - PRESENT

Portfolio Website — a single-page responsive portfolio website for showcasing Frontend Developer skills and projects.
Features: clear structure (About Me, Experience, Portfolio, Contacts), multilingual support (UA/EN/CZ), resume download, social/GitHub links, all project examples including team projects.
Tech Stack: HTML, CSS, JavaScript, responsive design, localization.
Skills: responsive design, content localization, external links integration, UX/UI optimization.
Role: independently selected the design mockup and fully developed the website from scratch.
Repository: GitHub

Team Work: YachtJet — responsive website for a yacht rental service.
Project type & role: Team project — Frontend Developer, responsible for the “Advantages” section.
Description & value: The website showcases yacht rental options, highlights service benefits, and provides a user-friendly experience for browsing and booking yachts. The Advantages section emphasizes key features that help users quickly understand the value of the service.
Tech Stack: HTML, CSS, JavaScript, responsive design, Vite.
Repository: GitHub

Weather App — a responsive web application for viewing weather forecasts in selected cities. The user can search for a city using autocomplete (input in Latin letters only) and access both daily and hourly forecasts. The application displays an interactive temperature chart by hours, as well as additional details such as wind speed and humidity. It also supports a multilingual interface (Ukrainian, Czech, English), making it convenient for different audiences.
Tech Stack: HTML5, CSS3 (responsive design), JavaScript (ES6), Chart.js, Fetch API, OpenWeatherMap API, JSON (city list).
Skills: working with external APIs, building dynamic charts, implementing autocomplete search, localization, responsive UI/UX design, and event handling.
Role: independently selected the design concept and fully developed the application from scratch, including both functionality and interface. Repository: GitHub

EDUCATION

BACHELOR 2012
Bohdana Hmelnytskoho | Cerkasy
Bachelor’s in Automation and Computer-Integrated Technologies

GoIT | Online 2024-Present
IT School GoIT 2024 – Fullstack Developer
